

## **AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions and listings of claims in the application.

### **Listing of Claims**

- 1-87. (Cancelled).
88. (New) A method of sanitizing a hard surface comprising:
- (a) providing a hard surface;
  - (b) providing a composition comprising at least one bacteriophage;
  - (c) applying the composition to the hard surface; and
  - (d) reducing the microbial count on the hard surface by at least about 1 log.
89. (New) The method of claim 88, wherein the composition comprises at least two bacteriophage, and at least two bacteriophage are effective against a different strain of the same bacteria.
90. (New) The method of claim 88, wherein the hard surface is located in a hospital.
91. (New) The method of claim 88, wherein the hard surface is located in a residence.
92. (New) The method of claim 88, wherein the hard surface is located on a farm.
93. (New) The method of claim 88, wherein the hard surface is located in a public area.
94. (New) The method of claim 88, wherein the hard surface is located on a hatchery.

95. (New) The method of claim 94, wherein the hard surface is at a location selected from the group consisting of an egg collection site, an incubator, a hatchery, a chicken house, a slaughter area, and a processing area.
96. (New) The method of claim 88, wherein the hard surface is selected from the group consisting of a piece of hospital equipment, a telephone, a television, a remote control, a wall, a floor, a vehicle, the interior of a building, and the exterior of a building.
97. (New) The method of claim 88, wherein the hard surface is located in a bathroom.
98. (New) The method of claim 88, wherein the composition is applied to the hard surface using a device selected from the group consisting of an aerosol, a wipe, a roller, a pump, a fogger, a mister, a manual sprayer, a power sprayer, a hose, a sprinkler, a brush, a towel, and a sponge.
99. (New) The method of claim 88, wherein the composition comprises at least one bacteriophage and at least one additional disinfectant.
100. (New) The method of claim 88, wherein the composition comprises additional functional ingredients selected from the group consisting of water, solvents, buffering agents, foaming agents, gelling agents, disinfectants, and mixtures thereof.
101. (New) A method of sanitizing a hard surface comprising:
- (a) providing a hard surface;
  - (b) providing a composition, wherein the composition comprises
    - i) at least one bacteriophage; and
    - ii) at least one additional disinfectant;
  - (c) applying the bacteriophage to the hard surface;

- (d) reducing the microbial count on the hard surface by at least about 1 log.
102. (New) A method of sanitizing a hard surface comprising:
- (a) providing a hard surface;
  - (b) providing a composition, wherein the composition comprises
    - i) at least one bacteriophage effective against a bacteria selected from the group consisting of Vancomycin Resistant Enterococci (VRE), *Staphylococcus*, *Pseudomonas*, *Campylobacter*, *E. coli*, *Salmonella*, or a combination thereof; and
    - ii) at least one disinfectant;
  - (c) applying the bacteriophage to the hard surface; and
  - (d) reducing the microbial count on the hard surface by at least about 1 log.
